

TECHNICAL REQUIREMENTS FOR RHODESSA JONES & IDRIS ACKAMOR & THE LOVE PROJECT

To the contrary notwithstanding, Sponsor agrees to supply or cause to be supplied at Sponsor's expense, the following requirements for performances of CULTURAL ODYSSEY.

FACILITY:

Sponsor shall provide:

- 1) A performance stage or dance floor at least 18 by 24 with a minimum ceiling clearance of 13 feet, with backstage or wings adjacent. The stage must be clean, free of splinters, tacks, nails, etc., and must be mopped prior to Artist's rehearsal/set-up time.
- 2) Adequate and secure storage space in the performance facility for Artist's property during the entire period of Artist's stay.
- 3) The stage area shall be exclusively available to the Company for at least seven hours, prior to the performance time, and continue without interruption up to the time the audience is normally admitted into the facility.
- 4) All lighting instruments and curtains shall be hung to Company's specifications prior to the Company's arrival. All lighting instruments shall be cabled as per Company's specifications prior to arrival.
- 5) Dressing rooms sufficient for ____ performer(s), equipped with tables, mirrors, lights, electrical outlets and chairs with close access to running water.

PERSONNEL

- 1) Sponsor shall insure that the resident stage manager of the performance facility, or a duly appointed representative with knowledge of the technical aspects of the facility and its electrical systems, shall always be present during the Company's load-in, set-up(s), rehearsal(s), performance(s), strike(s) and load-out.
- 2) Sponsor shall provide the following crew:
 - a) Set-up and Technical Rehearsals; Two persons seven hours on day of first performance.
- 3) A qualified lighting operator and sound operator are required for all performances, however, the Company reserves the right, at its sole discretion to use its own personnel to operate any and all of the performance facility's sound and light equipment for Company rehearsals and performances.

LIGHTING AND ELECTRIC

- 1) Sponsor shall provide Company with a scaled floor plan of the stage, a circuit diagram, a patch panel diagram and a light board diagram indicating the number of working and non-working dimmers, as well as the capacity of each

working dimmer. A complete and accurate fly or batten plan must be included, and an inventory of lighting instruments.

2) Company shall, prior to arrival, furnish Sponsor with a "Hanging Plot" and Sponsor shall insure that all lighting instruments specified therein be hung, circuited and patched prior to arrival of Company's Technical Director. Company shall be responsible for, and directly supervise all angling, focusing and gelling of the instruments, and for the preparation of all cue sheets.

3) Sponsor shall provide color medium.

4) Sponsor shall insure that performance facility's lighting system is not moved, re-angled, re-patched, re-circuited, re-gelled or otherwise altered without the expressed consent of the Company's Technical Director once it has been set for a performance, until after completion of the Company's final performance.

5) Sponsor shall provide lighting instruments as follows:

a) At least 14 ellipsoidal spotlights 500 watts minimum, and 14 Fresnels 500 watts minimum.

6) Sponsor shall provide all cable and connectors for lighting equipment as specified in "Hanging Plot."

7) Sponsor shall provide accompanying color filter frames for all instruments.

8) Sponsor shall provide ladders sufficient for working on lighting instruments.

SOUND

A sound system with at least an eight channel mixing board accompanied by two quality (IMPORTANT) speakers capable of reaching 300-500 audience members, and one quality microphone with straight stand and 20-30 foot cable. With audiences of 300 or more monitors for stage must be provided.
